Drone2Map for ArcGIS

ArcGIS Explorer

ArcGIS QuickCapture

1- Collect data
Using Survey123

2-Map data
Using ArcGIS Online

4 - Create Story Map

Workshop workflow

Analyze data
Using ArcGIS Online

3- Create Dashboard

We will build this example: Survey, ArcGIS Online Map, Story Map, Operations Dashboard

https://community.esri.com/community/education/blog/2019/08/27/how-

walkable-is-your-community

Let's go to work!

This lesson is organized in 4 parts:

Part 1: Creating a field survey using Survey123.

Part 2: Creating and analyzing a map from your survey data.

Part 3: Creating a dashboard from your survey data.

Part 4: Creating a storymap from your field data.

Why teach the platform?

. Collect needed data.

Connect people with issues in their own community.

data collection, citizen science, data assessment, mapping, spatial analysis, permissions, web apps, sharing.

Data fluency; critical thinking; spatial thinking. What they will encounter in the workplace.

Can you name this location?

1. Create Survey

Survey123 for ArcGIS

Form-centric field data collection

Leverages Smart forms

Analyze results immediately

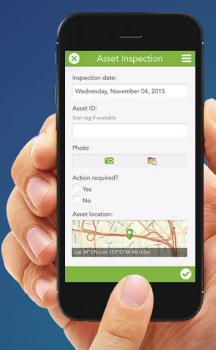

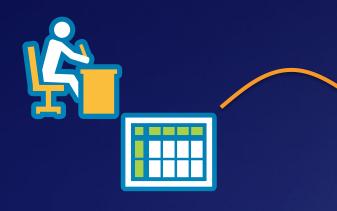

1- Ask Questions

(Design & Publish)

2- Get Answers

(Capture Data)

3- Make Decisions

(View & Analyze)

2 ways to create a Survey123

Today we will use this method

Create a New Survey

Using the web designer

- · Get started quickly
- · Best for simple surveys
- · Author your survey graphically

Get Started

Using Survey123 Connect

- Using a desktop application
- · Full smart form capabilities
- Author through XLSForms (spreadsheet)

Get Started

2. Create map

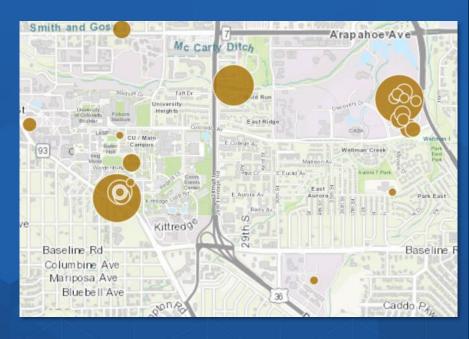

[2a]. Open feature layer (hosted) > fill in metadata.

[2b]. Open layer in ArcGIS Online Map Viewer. Save map.

The End Goal:

Not - points on a map, but understanding.

Hence, analyze the results spatially.

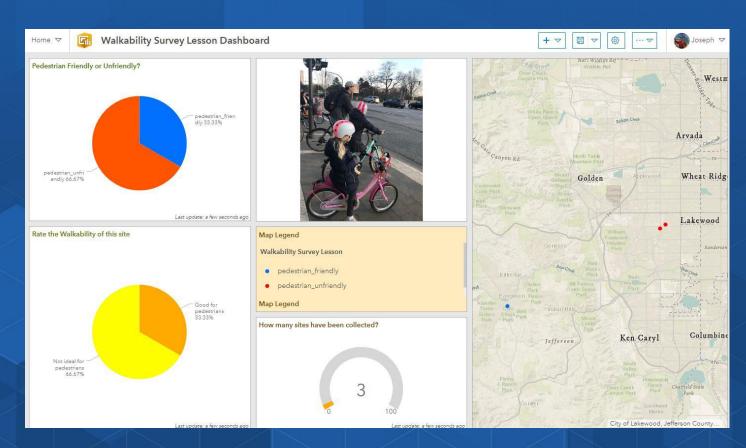

3. Create Dashboard

A dashboard allows you and others to quickly visualize your survey results in a series of maps and graphs.

[3a]. While viewing your web map, > Share > Create a web app > Dashboard.

[3b]. Edit your dashboard. Save. Share.

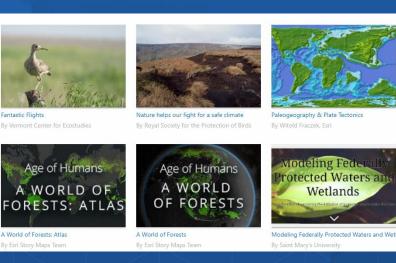

4. Create Story Map

A storymap allows you, with multimedia and interactive web maps, to tell the story about the problem you are studying, along with possible solutions.

[4a]. Go to: https://storymaps.arcgis.com > Create story map.

[4b]. Add elements to story map > save > share.

Connect these tools—GIS is a platform!

Embed a survey in a story map:

The Top 10 beautiful Ports

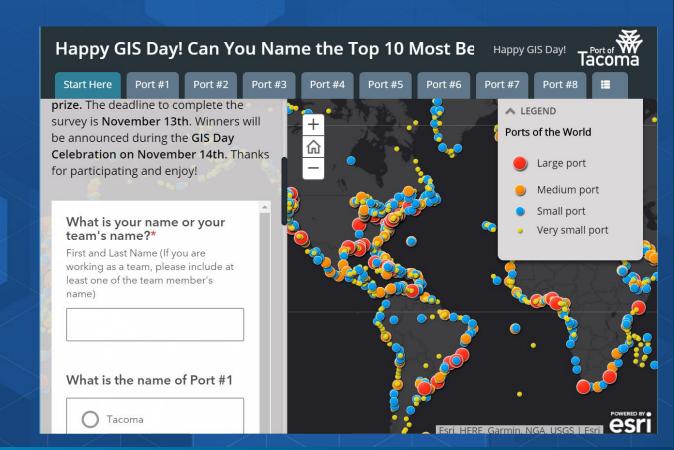

Use a survey in a dashboard:
